

Where Comfort is Essential

Standard Dimensions: Seat Width 16" or 18", Seat Depth: 17", Seat Height 15" (with seat pan), 16" (with strapped seat), Back Length: 24"

The Key to Comfort is in the Strapping!

Broda's Comfort Tension Seating™ contours to the patient sitting in the chair to reduce pressure and create long term sitting comfort

The strapping system has a memory retention that enables straps to return to their original shape within seconds

The Ideal Tilt Wheelchair

With its many positioning capabilities, the **587** is a cost effective chair for providing patients with maximum comfort and durability

Broda Comfort Tension Seating™ **minimizes seating pressure** while helping to control heat and moisture build up

Front pivot tilt in space lowers patient's center of gravity for **increased stability** and helps **prevent patient falls**

Frame design allows for **adjustment of seat height and depth** as well as allowing for **modular backs and/or a solid seat pan**

Foot propulsion is possible as front pivoting seat tilt maintains a **proper foot on floor position**

16 gauge powder coated tubular steel **frame ensures durability**

Infinite Positioning

Infinitely adjustable seat tilt up to 45° offers a range of positioning options

The 587 enables patients to propel with their arms or their feet. The front pivot seat tilt allows for a proper foot on floor position for propelling while using some tilt. **Excellent for preventing falls!**
